EDITORIAL

HB PROTECTIVE WEAR: BE SAFE. WE CARE.

Dear Sir or Madam,
Dear business partners and customers,

Despite the ongoing crises, the year 2022 was a very special one for us, because we can look back on 70 successful years entirely dedicated to PPE. From the very beginning, our focus has been exclusively on the development and manufacture of protective clothing. That is unique in Germany.

Today, we are the **quality and market leader** in our industry – and so are our products. Among other things, we are proving this with our new general catalogue 2023. Because, as always, we are not satisfied with what we have achieved, but are constantly improving our products. This also applies to our bestsellers.

For example **SECAN® Securo**, our classic for protection against liquid iron splashes. We have completely revised the collection and given it an ergonomic fit and a dynamic design. Both are convincing, as is the new lighter fabric, which continues to offer flame resistance up to 50 industrial washes in the usual SECAN® quality. Reflective stripes and fluorescent elements increase the visibility of people in dark surroundings, now also certified according to EN 17353. Matching this relaunch is also the new name: **HB-Iron Pro**. More on this from page 72.

With the re-designed **INOTEC® Arc & Energy** collection, we also offer versatile multi-risk PPE for demanding and changing work environments in the arc fault segment. The new zip-in membrane as liner trousers in 2-layer laminate provides additional moisture protection in the colder season. To be seen from page 64.

In our **FIRE & RESCUE SERVICES** product segment, we have developed the successful HB-WILDFIRE collection together with a professional fire brigade and adapted it to meet the increased demands of firefighting in open terrain. A lightweight outer material plus inner lining with hydrophilic finish, segmented reflective stripes and high-visibility vest exemption are just some of the features that make our new **HB-WILDFIRE 2.0**

a safe and comfortable outfit that reliably protects while relieving physical strain. Available in three colours plus a separate back collar in six colours. Find out more from page 174.

In addition, our **cold protection range** comes up with a completely renewed glove programme. And of course, in the new HB catalogue you will again find many PPE solutions with **women's power:** ladies' models for more than 25 collections.

We owe our success to our many years of experience in PPE and our extensive expertise in standardisation and processing. I would like to take this opportunity to thank all of our employees who work with passion and ambition every day to provide our customers with the best possible solution for protection against hazards in the workplace.

I hope you enjoy reading this report, in keeping with our brand promise:

„BE SAFE. WE CARE.“
Stay healthy!

HB PROTECTIVE WEAR

SUSTAINABLE PROTECTION IS OUR BRAND CORE

Since HB was founded more than 70 years ago, we have grown continuously. With protective clothing that sets standards throughout the industry. With sustainable corporate decisions that we have always made in the interests of our employees and partners. And with increasing success: it is not for nothing that we may call ourselves for many years the market leader for protective clothing in Germany.

We are strongly connected
to the sea turtle
through our logo,
but also as sponsor
of a conservation programme.

HB PROTECTIVE WEAR

QUALITY IS THE MEASURE OF ALL THINGS FOR US

For our customers, HB quality means +++ maximum safety +++ experts who know their craft +++ optimum support in selecting and finding the right product +++ maximum confidence in decision-making +++ the good feeling of getting the best quality

If you want to be the market leader, you have to be the quality leader – this motto has always determined our corporate behaviour. That's why all our processes are focused on quality. Highly qualified experts who are familiar with the latest PPE requirements advise and support our customers in their product selection.

WE HAVE PPE IN OUR DNA

As the only manufacturer in Germany, we have focused on the development and production of protective clothing from the very beginning. We know the requirements, work tirelessly on our expertise and are on a par with current developments.

- active participation in textile, research and standardisation bodies and committees to ensure our competence in standards, materials and production.
- co-operations with textile universities
- regular internal trainings for HB employees

THE RIGHT PRODUCT FOR EVERY NEED

It is our claim to offer every customer the protective clothing that meets his individual profile of requirements. In addition to our comprehensive and highly differentiated product range, we also implement special requests. We provide our customers with:

- the largest portfolio of protective clothing on the market
- personal advice meeting the individual demands
- precise information from our databases on material, function and care
- wearing and material tests such as pour-over tests
- implementation of the customer's CI in individual collections according to the PPE standards
- innovative individualisation of PPE through unrivalled offers such as READY TO WEAR and our modular system for metallised heat protection

FIRMLY ROOTED IN THE REGION

For us, quality is inconceivable without a high degree of consistency, trust and a down-to-earth attitude. It is not for nothing that we have been based in the German Westerwald for more than 70 years – with firm principles.

- own production facilities at the headquarters in Thalhausen where we manufacture samples, small series and finishing
- apprenticeship training of junior staff in four professions
- offers for our employees to promote work-life balance and health
- low fluctuation keeping the knowledge in the company

HB PROTECTIVE WEAR

OUR DEMANDS EXCEED THE STANDARDS' REQUIREMENTS

HB customers receive from us +++ quality above the PPE standards +++ high-quality, visually impeccable and durable products that withstand even the high demands of washers and leasers +++ desirable safety

The applicable PPE standards provide the framework for our product development. At the same time, we additionally feel committed to the values of a medium-sized company such as thoroughness and reliability. These demand even more of our products, realised through multi-stage quality assurance.

OUR RAW MATERIALS ARE THOROUGHLY TESTED

Extensive in-house testing ensures that the raw materials for our products are in perfect condition.

- material approval and quality assurance process in accordance with ISO 9001
- ignition tests according to EN ISO 15025 in our flammability test chamber
- defined receiving inspections such as fabric weight or colour measurement
- washing and drying according to industry standards ISO 15797 and ISO 6330

ALL GARMENTS UNDER CONTROL

Also our garments are subjected to thorough in-house tests. When they leave our company to the customer, they previously have passed through the following stages:

- 100 % manual final inspection
- our numbered and documented TURTLE TEST®
- a two-stage AQL control (Acceptable Quality Limit Control), done at our headquarters and checking whether the series production corresponds to the samples and whether all standard specifications have been met during the manufacture
- ESD conductivity tests

HIGHEST QUALITY DOWN TO THE LAST DETAIL

But we understand special quality to be more than just material and garment tests. For us, our particular high demands also include high-quality manufacturing processes such as:

- individually neaten and bound edges
- ESD garments manufactured with triple conductive thread
- modern 3D product development for a better fit

HB PROTECTIVE WEAR

WE TAKE TOP PERFORMANCE INTO SERIES PRODUCTION

Designing innovative product concepts and implementing individual customer demands is just as natural for us as reliably handling large orders. With a production capacity of more than 1.5 million garments per year, we need clearly defined and transparent processes. Additionally, our high-performance logistics enable us to react quickly and flexibly to all kinds of challenges.

UP-TO-DATE SERIES PRODUCTION

There are many parameters and processes that have to be right for a production of our size to run smoothly – from monitored production standards and uniform control systems to a clearly regulated sample approval for series production.

- regular product and process audits in our production sites
- AQL control in all facilities according to DIN ISO 2859-1
- consistently reproducible parameters
- documented sample approval
- own technicians for the abroad production, trained and certified in Germany
- traceability of every HB product throughout the entire manufacturing process

DELIVERED TO COMPLETE SATISFACTION

Our logistics processes are also state of the art. Regardless of whether the usual assortments have to be transported to the customer in large quantities, or products that are not available in stock have to be delivered in small quantities – we are on the spot punctually and reliably.

- short delivery times thanks to our warehouse with more than 2,300 m² and space for up to 500,000 garments
- good and long-standing co-operation with our production partners
- dynamic and flexible production planning
- production sites concentrated mainly in Europe
- short and flexible transport routes
- if something is not in stock: delivery within three weeks in small quantities, thanks to our unique high-speed delivery service 21 TO WEAR®

HB offers the customer +++ reliable and consistently high quality in series production
+++ product responsibility in one hand from development until shipping +++ transparency,
credibility and trustworthiness +++ speed, flexibility and security of supply

HB PROTECTIVE WEAR

WE OFFER BOTH: SERVICE AND PRODUCT QUALITY

The name HB stands for +++ reliable advice +++ customer-oriented services also after purchase +++ seamless communication: we keep our customers informed about everything concerning their PPE

Service and courtesy are integral parts of how we consider ourselves as a company. And they do not stop when the contract is signed. After all, we see ourselves as the customer's partner and support them with distinctive advisory skills, which they have come to appreciate in us.

SERVICE FIRST – EVEN AFTER PURCHASE

Our thinking is based on partnership. We demonstrate this after the purchase by supporting our customers with customised service on many occasions.

- convenient warehousing for the customer thanks to our generous storage capacities.
- before delivery to the customer: Sorting garments according to the wearer and providing them with emblems and badges according to the customer's wishes
- proactive advice and personal support
- continuous training of our employees by participating in PSA committees in the textile industry, standardisation bodies, research and textile services.

HB PROTECTIVE WEAR

WE ASSUME SUSTAINABLE RESPONSIBILITY

HB customers buy our products +++ with the good feeling
that our company takes care of employees and society

A responsible and sustainable approach to resources, employees and social issues is one of the central duties of our company. With our Code of Conduct, we ensure consistent and fair working conditions, and we also assume responsibility beyond this.

MAKING OUR EMPLOYEES FEEL APPRECIATED

Motivated people who identify with their work are the capital of every company. It is no wonder that the well-being of our employees is close to our hearts and that we do a lot to ensure that they are satisfied with their job:

- work & family balance through flexible working hours and a company-owned free day care centre
- internal and external training and coaching opportunities
- employee participation in the strategic alignment of the company
- health promotion through the company's own free fitness studio

COMMITMENT TO COMMUNITY AND SOCIETY

Corporate social responsibility is a much-discussed topic, especially in the textile industry. Through our Code of Conduct, we have created reliable action rules that must also be adhered to by our production facilities and by our suppliers. In addition, we have been involved in charitable work for many years now.

- regular social audits ensure that our products are manufactured under fair conditions
- social commitment on an international scale: our production partners receive bonuses which they use for charitable purposes on site
- social commitment on a regional level: we are specifically involved in charitable institutions in our region and regularly support them with donations

HB PROTECTIVE WEAR

WE PROTECT NOT ONLY PEOPLE BUT ALSO THE ENVIRONMENT

The basis of our success is a corporate philosophy that reflects the best traditional values of a medium-sized company. This also includes respect for the environment and its resources – so that our customers can buy and wear our products with a clear conscience.

HB customers buy our products +++ with the good feeling that our company is facing up to its responsibility for the environment

SUSTAINABLE ENVIRONMENTAL MANAGEMENT

Resource and environmentally conscious behaviour is permanently incorporated into our production processes. And no process is ever complete: Because we are constantly thinking about where and how we can act more sustainably and improve.

- sustainable use of resources by using high-quality materials and careful production of long-lasting protective clothing that can withstand many uses and washing cycles
- products made from sustainable and environmentally friendly materials such as organic cotton and recycled PET bottles
- storage of garments mainly in PP boxes instead of plastic bags
- reusable containers for the transport of goods – a circular effect that makes product packaging largely superfluous
- Up-cycling of leftover materials and accessories through our trainee project by making backpacks, mobile phone cases, glasses cases, key rings or tablet and laptop bags
- protection of the green sea turtle: we have been committed to the preservation of biodiversity on our planet by supporting a turtle protection programme for many years

HB PROTECTIVE WEAR

IMMUNE TO MANY DANGERS: MULTI-RISK PROTECTION FROM HB

Our working environment is becoming more and more complex, while the variety of tasks in individual workplaces is increasing. Multi-Risk PPE makes sense in many cases because it can protect against numerous risks. However, you should bear in mind that complete protection also involves compromises, because the more standards are met in a qualified manner, the heavier and more expensive the fabric usually becomes and the more complex its manufacture is.

Hightech protection to every detail

The high protective function of our multi-risk PPE is achieved through perfectly combined materials.

ONE RISK RARELY COMES ALONE

The decisive factor in choosing the right protective clothing is therefore not so much that it meets as many standards as possible as that it corresponds to the specific work situation. Whether you need a "generalist" or a "specialist" always depends on the individual case, which we clarify together with the customer. For this reason, our multifunctional products in this catalogue do not form a separate product category, but are instead integrated into the individual product segments – easily recognisable by the Multi-Risk logo.

- **HIGHLY VISIBLE:** The special surface structure of the attached retroreflective Reflective Film directly reflects the light back to its source
- **FLAME-RETARDANT:** Combustion properties of a material are controlled by chemical fibre configuration and design. Targeted removal of energy inhibits the combustion process and control pyrolysis
- **ANTISTATIC:** The antistatic core integrated into the yarn ensures high discharge capability and prevents electrostatic charging of garments
- **HIGHLY INSULATING:** Material design and volume allow for very good heat insulation. External heat energy is stopped, and the escape of body heat is prevented
- **BREATHABLE:** The heavy-duty polyurethane membrane has a water- and wind-repelling effect
- **COMFORTABLE:** The soft inner fleece conforms to the standards, allows high wearing comfort and has a heat accumulating effect

Pictograms

All of our tops feature standards pictograms that depict the protective properties of our certified PPE.

Details of polyurethane membrane

Two layers of water-absorbing (bottom) and water-repelling (top) molecules enable liquids transport from inside to outside.

Yarn details with carbon fibre

Cotton and modacrylic fibres plus Polyamide fibre with carbon core.

ARC & ENERGY

BECAUSE NOT EVERYONE WEARS
THE RIGHT DRESS BY NATURE

With our extensive Arc&Energy range, we offer the right clothing for many highly specialised work areas and fields of application. It reliably protects against arc flash and the risk of flammability, while impressing with a level of wearing comfort that feels completely natural, and not just in the workplace.

HB-BodySafe is a certified flame-retardant underwear that usefully supplements PPE clothing and increases its protective performance. Thanks to body mapping, the different requirements of the various body zones are taken into account. Breathable and with an optimal fit. Specially developed for use under PPE cat. II and III PPE.

Our HB-PROtection® shirt is made with organic cotton. It offers modern design as well as a comfortable, ergonomically improved “Comfort Fit”. The fabric has a very low weight and provides most high wearing comfort – and inherent flame retardancy. Additionally it offers reliable protection against Arc Flash and antistatic properties. Therefore, it is suited for many working areas and the perfect complement for many HB product lines.

Embroiderd standard pictograms

1| On request the shirt is also available in tight fitting “Body Fit”.

What is the Organic Content Standard?
 Organically grown cotton according to OCS 100 has been used in this shirt. Organic Content Standard 100 enables independent assessment, verification and traceability of the exact organic fiber content in the product. The OCS 100 certificate confirms that the organic content of the cotton used is at least 95 %.

MATERIAL: 54% MODACRYLIC, 44% COTTON (organic), 2% CARBON
FABRIC WEIGHT: approx. 195 g/m²
FIELDS OF APPLICATION: Heat and flame exposed workplaces, energy suppliers, public services, plant engineering and construction, electricians

Combined with the jackets of the HB-MODarc® collection, the shirts increase the protective function as an additional clothing layer and thus expand the application possibilities of the PPE. With the intelligent clothing combinations of the comprehensive HB-MODarc® product range, the arc fault protection class 2 can also be fulfilled.

HABETEX

Our most comprehensive product line HB-MODarc&vis®, which we present on the following pages, is a universal talent. The shirts offer multi-risk protection for underneath – and in summer also for outside! They are suitable for work areas that require multiple standards in combination with UV and high visibility. The FR vest with hi-vis protection is the ideal complement for many applications.

Part number 7kA/4kA: **01043 10000 010 2027**
Garment weight: approx. 940 g

2 |

2 and 3 | Flame-retardant reflective stripes, suitable for industrial laundry

3 |

2 and 3 | Front trousers available as 1-ply or 2-ply version
Electric Arc Flash protection 4kA or 7kA/4kA

Matching bib and brace trousers:
Zip-in membrane as liner trousers for additional moisture protection made of 190 g/m² light-weight material double-layer laminate FR
Part number: **05065 29004 000 519**

TROUSERS 4kA
Arc flash class 1
Part number 4kA: **01043 20000 004 2027**
Garment weight: approx. 650 g

TROUSERS 7kA/4kA
Arc flash class 2
Part number 7kA/4kA: **01043 20000 005 2027**
Garment weight: approx. 765 g

Two-coloured • attached waistband • 2 slant pockets • fly with covered zip • 2 back pockets with flap and snap fasteners • 1 folding rule pocket on the right • 1 leg pocket on the left with bellows pleat at the back, flap and snap fastener • reflective piping on saddle seam of back trousers • 2 reflective stripes at the bottom of the legs • no high-visibility clothing according to EN ISO 20471 and EN 17353.

BIB AND BRACE TROUSERS 4kA
Arc flash class 1
Part number 4kA: **01043 50100 004 2027**
Garment weight: approx. 800 g

BIB AND BRACE TROUSERS 7kA/4kA
Arc flash class 2
Part number 7kA/4kA: **01043 50103 000 2027**
Garment weight: approx. 920 g

Two-coloured • stretch straps with fixlock buckles • high-cut kidney protection • outside bib pocket with flap, reflective piping and covered snap fasteners • 1 side entry on the left, adjustable with buttons • fly with zip • 2 wing pockets • 2 seat pockets and 1 bellows leg pocket on the left, each with flap and snap fasteners • 1 reinforced folding rule pocket on the right with flap and snap fasteners • no high-visibility clothing according to EN ISO 20471 and EN 17353.

MATERIAL: 98 % ARAMIDE, 2 % CARBON

4kA: ATPV VALUE: 9.0 cal/cm² · 376.8 kJ/m² · **HAF VALUE:** 71.6 % · **FABRIC WEIGHT:** approx. 260 g/m²

7kA/4kA: FABRIC WEIGHT: approx. 260 g/m² + approx. 180 g/m²

FIELDS OF APPLICATION: Plant engineering and construction, energy suppliers, electric installation, public services, electricians

HEAT, SPLASHES & WELDING
YOU FEEL PERFECTLY EQUIPPED
FOR EVERY CRUCIAL TEST

There are situations where you have to be able to rely one hundred percent on your protective equipment. Our products in the Heat, Splashes & Welding category offer the highest level of safety whenever things get hot – in direct contact with sparks and splashes of liquid metal as well as in extreme heat exposure. Not to mention the many other dangers lurking in job and live.

SECAN® Plus 330 / 395

Thanks to a special finishing process SECAN® Plus welding protection garments meet the requirements of the leasing industry to a great extent. The material is hardly inflammable (it can withstand approx. 50 industrial laundings), and suited for fire hazardous areas as well as for works with liquid iron.

Liquid metal Fe
Part number: **01248 10048 001 52**
Garment weight: approx. 870 g

Single-coloured • turn-down collar • closure band with snap fasteners covered on both sides • 1 inner front pocket on the right • 1 front pocket on the left and 2 side pockets – each with flap and covered snap fasteners • sleeve hem width adjustable via inside covered snap fastener • standard pictograms as direct embroidery on the front • FR leasing label.

Standard pictograms as direct embroidery

2 and 3| Hip pocket and ruler pocket – each with flap and covered snap fastener

TROUSERS

Liquid metal Fe
Part number: **01248 20003 026 52**
Garment weight: approx. 810 g

Single-coloured • added waistband with covered buttoning • covered button fly • 2 side seam pockets • 1 hip pocket on the right and 1 ruler pocket on the right – each with flap and covered snap fastener.

BIB AND BRACE TROUSERS

Liquid metal Fe
Part number: **01248 50002 049 52**
Garment weight: approx. 950 g

Single-coloured • stretch braces with clamp-on clips • straight kidney protection • 1 outer bib pocket with flap and covered snap fastener • side access on the left and fly, each with buttoning • 2 side seam pockets with covered snap fastener • 1 hip pocket on the right and 1 ruler pocket on the right – each with flap and covered hook&loop fastener.

MATERIAL: 98 % COTTON, 2 % CARBON
FABRIC WEIGHT: approx. 420 g/m²
FIELDS OF APPLICATION: Steel works, metalworking industry, welding companies, foundries, plant construction, heat exposed workplaces

HB-Iron Pro

Relaunch of our bestseller for protection against liquid iron splashes (E3). Dynamic design and ergonomic fit are just as convincing as the performance: with only 420 g fabric weight, it offers the highest protection against heat radiation, welding splatters and large amounts of liquid iron. The SECAN quality guarantees flame resistance even after up to 50 industrial washes. Reflective stripes and fluorescent elements increase visibility, certified acc. to EN 17353.

| ITEM | COLOUR | COLOUR NO. | COLOUR NAME |  |  |  |  |  | REGULAR SIZES |

BIB AND BRACE TROUSERS
Welding protection class 2
Part number: **01237 50041 065 + COLOUR NO.**
Garment weight: approx. 1,130g

Two-coloured • seamed with contrast colour off-white • stretch braces with fixlock buckle • straight kidney protection • two-side access • PVC zip fly • 2 slant pockets • bib with outer pocket, flap and covered snap fastener • 1 hip pocket, 1 ruler pocket (+ pen pocket) and 1 bellows pocket (+ mobile phone pocket) – each with flap and covered snap fastener • knee pad pockets with adjustable covered hook&loop fastener.

MATERIAL: 89 % COTTON, 10 % POLYAMIDE, 1 % CARBON
FABRIC WEIGHT: approx. 390 g/m²
FIELDS OF APPLICATION: Welding companies, steel works, metalworking industry, foundries, plant construction

HB-welding & Vis

HB-welding & Vis was developed for welders working in areas at risk of arc flashes where high visibility is also required. With protection class 3 – the highest rating – HB-welding & Vis provides outstanding visibility even in poor viewing conditions, in workshops and in twilight. The material is wind-repellent and water-repellent, breathable and hard-wearing.

BIB AND BRACE TROUSERS
Welding protection class 2
Part number: **01121 5M002 000 2147**
Garment weight: approx. 1,360g

Two-coloured • black fix-lock braces, adjustable • doubled kidney protection • 1 bib pocket with flap and covered hook&loop, with mobile phone pocket and pen pocket with compartments • 2 slant pockets • 2 back pockets • 1 ruler pocket on the right and 1 bellow pocket on the left – each with flap and covered hook&loop fastener • 2 side accesses with adjustable covered button closure • fly with zip • knee reinforcement on the inside • flame retardant reflective stripes • standard pictograms as FR embroidery on left leg.

MATERIAL: 31 % POLYESTER, 28 % MODACRYLIC, 20 % ARAMIDE, 20 % VISCOSE, 1 % CARBON

FABRIC WEIGHT: approx. 320 g/m²

FIELDS OF APPLICATION: Welding companies, energy suppliers, track construction, chemical industry, public services, heat exposed workplaces, road construction

Fans of natural fibres should try out this work clothing with low flammability: Marlan contains 30 % wool and 50 % viscose. This fibre combination offers efficient protection against liquid aluminium and iron as metal splashes easily drip off. The polyamide part of the fabric improves the mechanical resistance.

HABETEX®

HB-FluidMetal Pro 340 / 430

HB-FluidMetal Pro, available in two weight classes, is the answer to the special requirements of the protective function of PPE for working with high temperatures or molten metal. The material has good moisture management and is comfortable to wear thanks to the balanced material mix. The fabric also offers anti-static properties and protects the wearer from electric arcs. Now also certified acc. to EN 17353 Hi-Vis protection.

1 and 2|
Antibacterial outer fabric

COOLING BANDANA
Accessories
Part number: **90026 76026 000 45**
Garment weight: approx. 90 g

Single-coloured • with ties at the back • back centre with flap for cooling the neck area • activated evenly with water in a few seconds without leaving condensation and water drops on the clothing • can be put on immediately under the helmet/headgear • outer fabric antibacterial due to natural silver ions • 3D high-tech polyester fleece.

2|

KNEE PADS
Accessories
Part number: **04033 76013 000 58**
Garment weight: approx. 70 g

The lightweight and sturdy knee pads protect the knees and increase comfort during activities that require kneeling. Suitable for all HB trousers equipped with knee pockets. Even withstands several domestic washings if it remains in the knee pockets (Note: no industrial laundry).

3|

Sale unit: 1 pair

BELT FR
Accessories
Part number: **01113 76012 000 46**
Garment weight: approx. 80 g

Stretch belt made of flame-retardant knitted material with plastic buckle, suited for heat protection clothing. The certified material meets the requirements regarding combustion behaviour and heat resistance and shrinkage with industrial laundry according to EN ISO 11612-A1.

4|

MATERIAL: 1| and 2| Outer material: 100% POLYESTER, inner material: 100 % COOLINE® POLYESTER ·
FABRIC WEIGHT: 1| and 2| approx. 580 g/m² ·
FIELDS OF APPLICATION: Heat and flame exposed workplaces, energy suppliers, public services, plant engineering and construction, electricians

For works in high-temperature environments, we offer aluminised heat protection clothing from head to toe in four different materials, including two lightweight and very high-performance qualities. They complete our product range, including COMFORT and COMFORT-Plus versions with numerous feature options. For example, the foundry coat is available in 84 and the heat protection jacket in 42 variants.

TEMPEX® TREME HEAT MATERIAL OVERVIEW

The materials differ in terms of the composition and construction of the carrier material, the type of aluminisation, the weight and the specific protective properties against the various forms of heat load. Wearing comfort and mechanical strength also vary.

| Material name | CK-12/Z | AW-1/Y | KF-3/Z | CK-4/Z |

JACKET
Metalized heatprotection (C3)
Part number: **12003 11080 000 15 (KF-3/Z)**
Garment weight: approx. 1,025 g

Inner collar with flame-retardant cotton lining • front with covered hook&loop fastener FR • FR seams • length: approx. 80 cm.
Further available lengths: 90 cm/100 cm.

TROUSERS
Metalized heatprotection (C3)
Part number: **12003 2H003 000 15 (KF-3/Z)**
Garment weight: approx. 1,131 g

Sewn-in adjustable suspenders • covered zip fly with snap fastener closure • FR seams.

21 TO WEAR

All other versions are available via our 21 TO WEAR® high-speed delivery service. For more information see the model overview on page 214/215.

FOUNDRY COAT
Metalized heatprotection (C3)
Part number: **12003 41030 000 15 (KF-3/Z)**
Garment weight: approx. 1,520 g

Inner collar with flame-retardant cotton lining • front with covered hook&loop fastener FR • FR seams • length: approx. 130 cm.
Further available length: 140 cm.

APRON WITH SLEEVES
Metalized heatprotection (C3)
Part number: **12003 71130 000 15 (KF-3/Z)**
Garment weight: approx. 1,125 g

Neckline with FR molleton • opening with covered hook&loop fastener • hook & loop fastener on the back • back protection with hook & loop fastener • ergonomic sleeves • sleeve width adjustable via snap fastener inside • all seams with FR thread • length: approx. 130 cm.

TEMPEX®-TREME HEAT

Our bib and half apron are also available in the robust KF-3/Z material and are now equipped with an adjustable hook&loop fastener for faster donning and doffing.

TEMPEX®-TREME HEAT
COMFORT

In the COMFORT program we offer all models in the materials CK-12/Z and AW-1/Y for high wearing comfort and protection. The jacket has hook&loop or snap fastener, ergonomic and width-adjustable sleeves as well as different lengths, the trousers have a comfort waistband and a hem-length hook&loop fastener.

Metalized heatprotection (C4)
Part number: **12008 71130 000 15 (AW-1/Y)**
Garment weight: approx. 1,005 g

Neckline with FR molleton • opening with covered hook&loop fastener • hook&loop fastener on the back • back protection with hook&loop fastener • ergonomic sleeves • sleeve width adjustable via snap fastener inside • all seams with FR thread • length: approx. 130 cm.
Further available length: 140 cm.

BIB APRON
Metalized heatprotection (C4)
Part number: **12008 71131 000 15 (AW-1/Y)**
Garment weight: approx. 520 g

Neck strap • hook&loop fastener for closing • all seams with FR thread • length: approx. 130 cm.
Further available length: 110 cm.

TEMPEX®-TREME HEAT COMFORT Plus

The COMFORT Plus program comprises the most comfortable equipment: the COMFORT versions are supplemented by additional features. In addition to the standard underarm ventilation, we offer optional additional back ventilation and, in the case of the caster coat, also the choice between a walking slit and the more comfortable concealed walking pleat for the best possible freedom of movement with optimum protection even when walking.

 dark blue

Our new heat protection gloves are available in different variants, lengths and sizes and offer protection against thermal risks according to EN ISO 407 as well as mechanical hazards according to EN 388 thanks to selected material combinations and insulation layers.

Protective gloves against thermal risks EN 407:2020

Protective gloves tested according to this standard protect against heat and/or fire. The actual protective performance depends on the test performed during certification and the level of performance achieved, with 1 being the lowest and 4 the highest. "X" means not tested.

| Test | Performance Level | | | |
|-------------------------------------|-------------------|-------|------|------|
| | 1 | 2 | 3 | 4 |
| Combustion behavior | | | | |
| Afterflame time (in sec.) | < 20 | < 10 | < 3 | < 2 |
| Afterglow time (in sec.) | n.r. | < 120 | < 25 | < 5 |
| Contact heat | | | | |
| Contact temperature Tc (in °C) | 100 | 250 | 350 | 500 |
| Threshold t1 (in sec.) | > 15 | > 15 | > 15 | > 15 |
| Convective Heat | | | | |
| Heat Transfer Index HTI (in sec.) | > 4 | > 7 | > 10 | > 18 |
| Radiant heat | | | | |
| Radiant heat transfer t24 (in sec.) | > 7 | > 20 | > 50 | > 95 |
| Small splashes of molten metal | | | | |
| Number of splashes | > 10 | > 15 | > 25 | > 35 |
| Large splashes of molten metal | | | | |
| Liquid iron splashes (in g) | 30 | 60 | 120 | 200 |

4 means the highest and 1 means the lowest performance level. n.r. means "no requirement".
X means "not tested". 0 means "below the minimum requirements".

For higher durability in contact heat, we rely on selected materials and different insulation layers, especially in the palm area, so that protection against heat up to 500 °C can be reached there. High resistance to radiant heat and splashes of molten metal is achieved primarily through the use of aluminised materials.

Protective gloves against mechanical risks EN 388:2016

This standard specifies the test methods and performance requirements of protective gloves against mechanical risks. The specific protective performance depends on which test is carried out during certification and which performance level is achieved, 1 being the lowest and 5 the highest performance level. "X" means not tested.

| Test | Performance Level | | | | |
|--|-------------------|-----|------|------|----|
| | 1 | 2 | 3 | 4 | 5 |
| Abrasion resistance (Number of cycles) | 100 | 500 | 2000 | 8000 | |
| Cutting resistance (Factor) | 1,2 | 2,5 | 5,0 | 10,0 | 20 |
| Tear strength (in newton) | 10 | 25 | 50 | 75 | |
| Cutting strength (in newton) | 20 | 60 | 100 | 150 | |

5 means the highest and 1 means the lowest performance level.
X means "not tested". 0 means "below the minimum requirements".

The choice of materials in the palm has a decisive influence on the mechanical properties and wear. The abrasion resistance and tear resistance are the focus of our requirements.

METALLISED HEAT PROTECTION GLOVES UP TO 500 °C CONTACT HEAT

| ITEM |  |  | MATERIAL LAYER CONSTRUCTION | | | LENGTH | SIZES |
|------|---|---|---|--------------------------------------|----------|----------------|-------|
| | | | UPPER | ISOLATION | LINING | | |
| 1 | | | Polyacrylnitril (Preox), Aramide, chrome split leather | Half wool non-woven | Molleton | approx. 410 mm | |

3-FINGER GLOVES 410 + LEATHER
Accessories
Part number: 12015 71005 000 2271

Two coloured • thumb and palm of hand with 3-layer construction • leather wedge between index and middle finger • good palm of hand isolation • very good radiant heat protection • high abrasion resistance in palm of hand.

3-FINGER GLOVES 450 + ARAMIDE
Accessories
Part number: 12015 71003 001 2269

Two-coloured • thumb and palm of hand 4-layer construction • very good palm of hand isolation • very good radiant heat protection • good abrasion resistance in palm of hand.

MITTENS 440 + ARAMIDE
Accessories
Part number: 12015 71004 002 2269

Two-coloured • thumb and palm of hand 4-layer construction • very good palm of hand isolation • very good radiant heat protection • good abrasion resistance in palm of hand.

Our new heat protection gloves are available in different variants, lengths and sizes and offer protection against thermal risks according to EN ISO 407 as well as mechanical hazards according to EN 388 thanks to selected material combinations and insulation layers.

METALLISED HEAT PROTECTION GLOVES UP TO 250 °C CONTACT HEAT

CHEMICALS

THESE MATERIALS STRENGTHEN YOUR DEFENCE SYSTEM

The tricky thing about chemicals is that the dangers they pose are sometimes barely noticeable. That's why we use fabrics that ensure that nothing can penetrate to the skin. Suitable underwear included. How good that despite all protection we never lose sight of important aspects such as pleasant material properties and above all: freedom of movement.

Comfortable in dangerous environments: HB-CHEMstandard combines reliable chemical protection in accordance with EN 13034: type 6 and extraordinary wearing properties that even have the benefit of being slightly warming due to the characteristics of the material.

| ITEM | COLOUR | COLOUR NO. | COLOUR NAME |  | REGULAR SIZES |

| 1, 2, 4, 5 3 |  | 56 | iron grey | EN 13034 Type 6 | 46–58 & 94–110 39/40–47/48 |

JACKET

Chemical protection type 6
Part number: **02001 10136 001 56**
Garment weight: approx. 535g

Single-coloured • turn-down collar • closure band with covered snap fasteners on both sides • 1 front pocket on the left and 2 side pockets with flaps and covered snap fasteners • 1 inner front pocket on the right • sleeve hem width adjustable via inner covered snap fasteners.

COAT

Chemical protection type 6
Part number: **02001 40032 001 56**
Garment weight: approx. 690g

Single-coloured • lapel collar, also worn tightly closed • closure band with covered snap fasteners on both sides • 1 front pocket on the left and 2 side pockets – each with flaps and covered snap fasteners • 1 inner front pocket on the right • sleeve hem width adjustable via inner covered snap fasteners.

SHIRT

Chemical protection type 6
Part number: **02001 60000 004 56**
Garment weight: approx. 490g

Single-coloured • turn-down collar • closure band with buttons • 1 front pocket on the left with flap and buttoning • wristband with buttoning.

TROUSERS

Chemical protection type 6
Part number: **02001 20085 001 56**
Garment weight: approx. 535g

Single-coloured • added waistband with 7 belt loops • 2 slant pockets, 1 hip pocket on the right with flap and covered hook&loop fastener • 1 ruler pocket on the right with flap • covered button fly.

BIB AND BRACE TROUSERS

Chemical protection type 6
Part number: **02001 50063 001 56**
Garment weight: approx. 665g

Single-coloured • stretch braces with clamp-on clips • 1 outer bib pocket and 1 hip pocket on the right – each with ap and covered hook&loop fastener • 2 side seam pockets • 1 ruler pocket on the right with flap • covered button fly • 2 side accesses adjustable via buttons.

MATERIAL: 100 % POLYACRYLIC, FC-EQUIPMENT • **FABRIC WEIGHT:** approx. 270 g/m² •

HB-CHEM

HIVIS & WEATHER

WELCOME TO YOUR
PERSONAL COMFORT ZONE!

The best thing about our HiVis & Weather collections: comfortable fit and modern design give you a great feeling in your outfit and make you look really good. And not just in good weather, but especially in wet, cold, foggy, drizzly and dark conditions. With bright colours and cleverly placed reflective stripes, our high visibility and weather protection clothing sends out strong signals that can't be missed.

HI-VISION® Basic

The shirts with segmented reflective stripes combine effective high-visibility protection with UV protection, design and wearing comfort. Polyester on the outside and cotton on the inside ensure optimal moisture transport. UV protection 50+ is the highest protection according to the European classification and better than the standard requires: the fabric lets only 2 % of UV rays through.

| ITEM | COLOUR | COLOUR NO. | COLOUR NAME |  |  | REGULAR SIZES |
|-------|---|------------|------------------------------------|---|---|---------------|
| 1 , 2 |  | 2161 | fluorescent orange-red/hydron blue |  |  | Unisex S-2XL |
| |  | 2162 | fluorescent yellow/hydron blue | | | |

POLO-SHIRT SHORT SLEEVE

High-Visibility
Part number: 04025 80009 002 + COLOUR NO.
Garment weight: approx. 330 g

Two-coloured • round design and cut with contrast stitching in off-white • polo opening with zip fastener with encased zipper • reflective film in body language, attached as patch, stretchy (segmented) • HB logo as direct embroidery on back • standard pictograms as direct embroidery on right sleeve hem.

T-SHIRT

High-Visibility
Part number: 04025 80008 003 + COLOUR NO.
Garment weight: approx. 310 g

Two-coloured • round design and cut with contrast stitching in off-white • round neck opening • reflective film in body language, attached as patch, stretchy (segmented) • HB logo as direct embroidery on back • standard pictograms as direct embroidery on right sleeve hem.

| | |
|--|---|
| MATERIAL: 55 % COTTON, 45 % POLYESTER · |  |
| FABRIC WEIGHT: approx. 185 g/m² · | |
| PROPERTIES: Offers UV protection 50+ and is therefore better than the EN standard requires. It only lets pass 2 % of the UV rays. That means “very high protection” according to the European Classification. · | |
| FIELDS OF APPLICATION: All summer work in factory and public places; suitable for public utility companies, supply and disposal contractors | |

HI-VISION® Basic

Our high-quality fleece jacket from the HI-VISION® Basic program is perfect for wearing it as an additional warming layer, for example under a parka. Worn solo, it alternatively offers protection on cool days in the transitional period from summer to fall or winter to spring.

| ITEM | COLOUR | COLOUR NO. | COLOUR NAME | REGULAR SIZES |

Clothing that adapts to your movement: The ergonomic cut of the TEMPEX® THERMO ERGOPLUS provides excellent freedom of movement for the wearer. The jackets have pre-formed sleeves with optimised pivot spacing and an extended “drop-tail” back, the body warmers have a close-fitting cut and the trousers have pre-formed legs. Both product lines can be combined with our cold store and chill room clothing. The ladies’ versions have a slightly fitted cut.

TEMPEX® THERMO ACCESSORIES

In a multi-layered clothing system the underwear plays an important role. It protects the wearer from cooling down due to the close-to-skin fit providing insulating and moisture-regulating properties. Our underwear offers high wearing comfort and allows a climate regulation for high active working thanks to its material composition.

GRS – Global Recycled Standard

This product is developed from recycled PET bottles which have been collected in Europe and is GRS certified. The production of the rPET yarn requires 60 % less energy and avoids 2.4 kg of waste per kg of yarn. GRS is an international, voluntary and full product standard and defines requirements for the certification of recycled materials in terms of chain of custody, social and environmental practices and chemical restrictions.

Soft lap seam on the back

TEMPEX® THERMO ACCESSORIES

With us, you will find the right cold protection gloves for your work in the deep-freeze or cold room area – suitable for a wide range of applications in trade as well as in industry, logistics and research. Besides our new cold protection gloves with certified protection against cold and mechanical risks, which are particularly suitable for order pickers, we also offer fleece and underlay gloves.

Protective gloves against cold EN 511:2006

This standard specifies the test methods and performance requirements of protective gloves against cold. The insulating capacity of the material on contact, the resistance to progressively penetrating cold and the thermal resistance to direct contact with a cold object are measured. The three-digit code next to the standard pictogram indicates the performance levels, with 0 corresponding to the weakest and 4 to the highest performance. Water resistance is defined with two performance levels: 0 = Water penetration after 30 min, 1 = No water penetration after 30 min.

Performance levels for protective gloves against cold according to EN 511

| Test | Performance Level | | | |
|---|---------------------------|---------------------------|---------------------------|--------------------|
| | 1 | 2 | 3 | 4 |
| Convective Cold Thermal Insulation/ t_{TR} (in $m^2 K/W$) (Insulation value) | $0,10 \leq t_{TR} < 0,15$ | $0,15 \leq t_{TR} < 0,22$ | $0,22 \leq t_{TR} < 0,30$ | $0,30 \leq t_{TR}$ |
| Contact Cold Thermische Isolation/ t_{TR} (in $m^2 K/W$) (Widerstandswerte) | $0,025 \leq R < 0,050$ | $0,050 \leq R < 0,100$ | $0,100 \leq R < 0,150$ | $0,150 \leq R$ |
| Waterproofness | No water penetration | | | |

4 means the highest and 1 means the lowest performance level. X means "not tested". 0 means "below the minimum requirements".

Protective gloves against mechanical risks EN 388:2016

This standard specifies the test methods and performance requirements of protective gloves against mechanical risks. The specific protective performance depends on which test is carried out during certification and which performance level is achieved, 1 being the lowest and 5 the highest performance level. "X" means not tested.

| Test | Performance Level | | | | |
|--|-------------------|-----|------|------|----|
| | 1 | 2 | 3 | 4 | 5 |
| Abrasion resistance (Number of cycles) | 100 | 500 | 2000 | 8000 | |
| Cutting resistance (Factor) | 1,2 | 2,5 | 5,0 | 10,0 | 20 |
| Tear strength (in newton) | 10 | 25 | 50 | 75 | |
| Cutting strength (in newton) | 20 | 60 | 100 | 150 | |

5 means the highest and 1 means the lowest performance level. X means "not tested". 0 means "below the minimum requirements".

FIRE & RESCUE SERVICES

GO ALL OUT FOR
YOUR MISSION

In addition to high-quality day shift wear for fire brigades, we also offer modern protective clothing for technical assistance and area fire fighting. They meet the highest functional demands and also impress with a great look, useful features and outstanding wearing comfort. So much in fact, that you'll be happy to keep them on even after you've gone off duty.

Like all Flammgard® products, this day service clothing is made of a hard-wearing and high-quality fabric. Firefighters wear it when they are not on fire duty – e.g. for equipment maintenance, training courses or fire safety watches. It is comfortable like leisure wear, looks presentable and also protects in case of fire.

FABRIC WEIGHT: approx. 230 g/m²
FIELDS OF APPLICATION: Fire fighting in wide areas, Technical Assistance

ESD ELECTROSTATIC DISCHARGE

NO MATTER WHAT ELECTRIFIES YOU: YOUR OUTFIT
REMAINS UNAFFECTED

Not everyone has the ability to let environmental voltages roll off them. Our high-quality ESD clothing does: it offers reliable conductivity and prevents sensitive product parts in electronics production from being damaged by electrostatic discharge. Very reassuring: each of our products has to pass extensive tests to become part of our unrivalled ESD range.

CONDUCTEX® is one of the lightest and most comfortable materials for protection of products against electrostatic discharge. Furthermore, the blended fabric offers a good functionality and high wearing comfort. The closure seams are additionally edged. Fabric with the quality label "breathability" of the Hohenstein certifiaproxion institute.

CLEANROOM & DUST

OUR PURITY LAW DOES NOT APPLY TO YOUR BEER.
BUT IT DOES FOR YOUR COVERALL

Not a grain of dust, not a lint – this is the ideal of a cleanroom. What is not intended in nature is indispensable in paint shops, for example. In the cleanroom, it is the hour of fabrics that secrete as little as possible and also function as filters for particles emitted by the body. A lot of experience and skills are needed to manufacture from these our first-class products.

HABETEX® climatic Pro

This tried and tested cleanroom fabric offers the perfect combination of particularly high wearing comfort, optimised stability and a very low weight. The manufacture of our fabric HABETEX® climatic Pro is specially adapted to suit the specific requirements of cleanrooms.

COAT

Part number: **06008 37012 001 + COLOUR NO.**
Garment weight: approx. 640 g

Single-coloured • turn-down collar • covered 2-way PVC zip fastener • 2 attached front pockets and 1 hip pocket, each with flaps and covered hook&loop fastener • 1 inner front pocket on the left • 1 ruler pocket on the right • 2 attached thigh pockets with bellows • 1 leg pocket on the left as bellows on side seam with flap and covered hook&loop fastener • waist adjustment via integrated elastic band with drawstring and stoppers • ventilation via mesh inserts in armpit area • wristbands with vent and hook&loop fastener • leg opening with vent and adjustable via hook&loop fastener.

Regular sizes: 46/48–58/60

- 10** white
- 53** grey

MATERIAL: 98 % POLYESTER, 2 % CARBON • **FABRIC WEIGHT:** approx. 150 g/m² •

CHARACTERISTICS: fuzz resistant, suited for cleanroom areas with high requirements •

HIGH PARTICLE RETENTION: nearly 100 % for particles > 5 µm •

FIELDS OF APPLICATION: Automotive industry, paint shop

HABETEX®

Despite its very high density, this cleanroom fabric has a low fabric weight. Thus, HABETEX® Micronselect is very comfortable and offers high water vapour permeability. The manufacture of our fabric HABETEX® Micronselect is specially adapted to suit the specific requirements of cleanrooms.

EMBLEMS AND PATCHES

HB
PROTECTIVE
WEAR

HOW YOUR PPE BECOMES YOUR CORPORATE IDENTITY

Your employees' protective clothing is now just as much a part of your company's image as your website or vehicles – it is your company's business card as it conveys expertise and is immediately perceived by your customers. Equipped with company emblems and name badges, it also supports employees' identification with the company and is an important distinguishing feature.

However, to ensure that safety doesn't get left behind and conformity with standards doesn't suffer, a few important points must be noted.

The PPE Regulation, which has been in force since 2018, clearly stipulates that any subsequent changes to PPE that are not in accordance with the respective Type examination certificate will result in the certification becoming null and void. This means that anyone who makes a change of this kind becomes the manufacturer of a new item of PPE, which must undergo recertification.

At HB Protective Wear, we have certified our product lines in such a way that they can be equipped with different emblem variants. Embroidered emblems,

direct embroidery, patched or woven emblems are available in different sizes depending on the product.

We only use materials that have successfully undergone certification so that the certified protective properties of the garments are still guaranteed after finishing. To see which emblem variants are available for your collection, please refer to the overview starting on page 206.

If you would like to attach emblems to your HB Protective Wear garments or those of your customers yourself, please contact us. We will be happy to provide information on what to consider concerning material, size and attachment position when customising your HB collection. This is because only materials and emblem sizes that have been tested in the course of certification may be used, so as not to put the certification and safety of your protective clothing at risk.

IMPORTANT INFORMATION FOR ATTACHING EMBLEMS AND BADGES:

The implementation of certification-relevant changes to protective clothing – such as the subsequent affixing of emblems – by third parties, which are not carried out in conformity with the manufacturer's specifications, means that the products concerned are no longer covered by the respective Type examination certificate and the certification becomes null and void. Subsequent attachment of any emblems to our protective garments is only possible if they have been certified as part of a Type examination. Therefore we would advise that the finishing of our protective clothing products is carried out by HB as the manufacturer.

EMBROIDERED EMBLEMS

Emblems (made from antistatic fabric), accessories and other features with no conductive properties, have to be firmly attached without being able to become detached; it is not allowed to fix them via hook&loop fastening or via snap fasteners.

If a background material and/or embroidery yarn not tested by the manufacturer is used, the embroidered emblem must be explicitly tested on the desired materials if the size exceeds 100 cm²!

Manufacture:
Background and embroidery yarn is only to be used in certified FR version.

If a background material and/or embroidery yarn not tested by the manufacturer is used, the embroidery emblem must be tested individually.

The stitching of the embroidery emblems must be done with FR yarn

Manufacture:
For the EN standard code E and D 1-3, manufacture in the roof tile effect is always necessary to do.

In order to comply with the determined high-visibility protection classes, the manufacturer's instructions regarding the maximum available space for the emblem application must be considered when selecting the emblem sizes.*
At least 5 cm distance to reflective stripes are to be kept.

Free-standing embroidery badges are to be tested on the garment. In addition, same fabric or a comparable material with the same or higher performance class is to be used as background material.

Small embroidery badges that can be attached touching the edges are allowed.

Embroidered emblems can be applied without affecting the thermal insulation specified by the manufacturer.*

DIRECT EMBROIDERIES

Manufacture:
The direct embroidery absolutely must be underlaid with a FR material towards the body.
The embroidery yarn is only to be used in certified FR version. If another embroidery thread is used, the direct embroidery must be tested individually.

In order to comply with the determined high-visibility protection classes, the manufacturer's instructions regarding the maximum available space for the emblem application must be considered when selecting the emblem sizes.*
At least 5 cm distance to reflective stripes are to be kept.

The direct embroidery must be underlaid with outer fabric towards the body.
Direct embroideries larger than 20 qcm must be explicitly tested on the garment. Large direct embroideries are generally not recommended.

Direct embroideries are only allowed to be attached for the following product lines: Comfort, Hygiene, Contour and Fleece; they need to be tested depending on the embroidery's size.*

PATCHED EMBLEMS

If a patch emblem not tested by the manufacturer is used, the patch emblem must be explicitly tested on the desired materials if the size exceeds 100 cm²!

Manufacture:
Material qualities not shown in our catalogue (see pages 214–217), and marked as certified, must be tested individually in the largest possible size in accordance with EN 15025, ISO 17493 and EN 1149-5 and, if necessary, in accordance with the standard specification code D + E.

In order to comply with the determined high-visibility protection classes, the manufacturer's instructions regarding the maximum available space for the emblem application must be considered when selecting the emblem sizes.*
At least 5 cm distance to reflective stripes are to be kept.

Patch badges up to a size of 320 x 120 mm are tested and approved by the manufacturer.

Not allowed.

WOVEN EMBLEMS

Web emblems that are not conductive must be firmly attached without being able to become detached.

For woven emblems larger than 10 cm² has to be available a recent test report according to EN 15025.

In order to comply with the determined high-visibility protection classes, the manufacturer's instructions regarding the maximum available space for the emblem application must be considered when selecting the emblem sizes.*
At least 5 cm distance to reflective stripes are to be kept.

Woven badges larger than 20 qcm must be explicitly checked.

Woven emblems can be applied without affecting the thermal insulation specified by the manufacturer.*

* The details of the maximum available space for the emblem application are shown on our product data sheets for each sales item. Please contact our sales representatives for more information (see page 239).

The following versions will be supplied within our high-speed delivery service 21 TO WEAR®.
First order starting with 1 piece and delivery time approx. 21 days.
No stock-keeping for these products. Requirements of more than 30 pieces will normally be produced separately, the production time then will be approx. 6-8 weeks from receipt of order.

PRODUCT VARIANTS OF OUR MODULAR HEAT PROTECTION SYSTEM

Here you will find all relevant tables and information concerning our TEMPEX® TREME-Heat modular system. Choose between many different features and product variants. This modular clothing system enables you to put together your own personal heat protection equipment according to your individual requirements at the work place.

The following products will be, in case they are not available on stock, supplied within our high-speed delivery service 21 TO WEAR®. First order starting with 1 piece and delivery time approx. 21 days*. Requirements of more than 30 pieces will normally be produced separately, the production time then will be approx. 6–8 weeks from receipt of order.

MATERIAL VARIANTS OF THE MODULAR HEAT PROTECTION SYSTEM

The following table shows the different materials and indicates the material name, the material composition, the material weight and the certified fabric’s standards.

| Part number | Material name | Material | Material weight | Standards |
|---------------|---------------|--------------------------|-----------------|--------------------------------|
| 120xx = 12014 | CK-12/Z | 70 % Preox, 30 % Aramide | approx. 360 g | EN ISO 11612 A1/B1/C3/D3/E3/F1 |
| 120xx = 12008 | AW-1/Y | 100 % Aramide | approx. 420 g | EN ISO 11612 A1/B1/C4/D3/E3/F2 |
| 12003 | KF-3/Z | 100 % para-aramide | approx. 475 g | EN ISO 11612 A1/B1/C3/D3/E3/F1 |

▶ READY TO WEAR

ONE SYSTEM, MORE THAN 1,000 POSSIBILITIES.

Below you find a matrix that shows you the different possible equipment variants. With READY TO WEAR, you have the choice: a second combat leg pocket, additional knee pockets and reflective stripes; coverall or suit (jacket + trousers); choose between six colours depending on the colour

that corresponds to your corporate company colours.

Enjoy maximum flexibility combined with minimum delivery time of only 21 days.* Choose from 4 products, 216 colour combinations, 12 equipment versions and 28 sizes. Available if you order 15 or more units of any one item. **

WEAR

INSULATION VALUES COLD PROTECTION

This table shows the performance levels of our TEMPEX® cold protective wear. It shows the duration of use for the relevant clothing in relation to temperature and physical strain. The performance levels are light duty (more static works) and medium duty (works where you move more). The specified values are achieved only if jacket and trousers of the same material construction are worn.

| | Part Number | Part | Insulation value / m² · K/W R-value | Standing activity 75 W/m² | | | | Activity with low movement 115 W/m² | | | | Activity with regular movement 170 W/m² | | | |
|-------------|-----------------|---|---|------------------------------|-------|-------|-------|---|-------|-------|-------|---|-------|-------|-------|
| | | | | Air speeds | | | | Air speeds | | | | Air speeds | | | |

If a cold protection suit is selected from this table for a specific workplace, it must be ensured that the hand and foot coverings also has sufficiently high heat insulation for the ambient temperature that is present and that the face and head are properly protected. The specified values are achieved only if a jacket and trousers of the same construction are worn. The heat insulation may be converted into clo: 1 clo = 0,155 m²K/W.

IMPORTANT! TEMPEX® Cold Store garments are classified acc. to EN 342 Category II. Therefore it is not allowed to wear them at temperatures below -49°C.

IEC 61482-2
IEC 61482-2:2009 (preceding standards: EN 61482-1-2 and ENV 50354)
Protective clothing against the thermal hazards of an electric arc
This Type of protective clothing is intended to protect the wearer against thermal effects of a defined electric fault arc according to the tested protection level e.g. protection class.

The Standard defines general requirements and requires an electric arc flash test. The material and garments tests are carried out either according to IEC 61482-1-1 (determination of the ATPV value) or IEC 61482-1-2 ("Box-Text"; preceding standard EN 61481-2). The tested protective clothing does not replace electrically insulating protective clothing such as clothing in accordance with EN 50286:1999, "Electrically insulating protective clothing for work on low-voltage installations". Complete personal protection also requires suitable protective equipment such as safety helmet/visor, protective gloves etc.

EN ISO 11611
(preceding standard: EN 470-1)
Protective clothing for use in welding and related processes

This Type of protective clothing is intended to protect the wearer against weld spatter (small splashes of molten metal), short-term contact with flames as well as radiant heat from the electric arc. Under normal welding conditions, it offers limited electrical insulation against electric conductors of up to 100 V DC. This standard sets out two classes with specific performance requirements (class 1 is for lower requirements, class 2 for higher requirements).

EN ISO 11612
(preceding standard: EN 531)
Clothing to protect against heat and flame
This international standard specifies the minimum requirements for clothing protecting against heat and/or flames. In a wide variety of fields of application, the wearer can also be exposed to convective, radiant or contact heat, as well as splashes of molten metal. Within the standard, letters A-F define the performance levels relating to the protective properties listed above.

EN 1149-5
(preceding standard: EN 1149-5)
Electrostatic properties - Material performance and design requirements

This standard specifies the requirements to be met by the materials used in and the design of electrostatically conductive protective clothing forming part of a fully earthed system to avoid ignitable discharge. The antistatic function is defined as minimising the risk of flammable discharge (explosion). The requirements may not be sufficient in a combustible atmosphere

enriched with oxygen. Protective clothing certified by this standard is not considered protection against mains voltage.

EN 61340
Protection of electronic devices from electrostatic phenomena
Protective clothing with this standard is suitable for the manufacture of products, which are sensitive to discharges of 100V or more. Persons with ESD protective clothing are therefore protecting products during the manufacturing process from electrical discharges, which can happen with clothing that is not suitable for ESD, e.g. through friction or electrostatic induction (magnetic field, field effects) and/or material separations, and are therefore preventing damage to the component.

EN 13034 Type 6
Protective clothing against liquid chemicals – Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals

This standard specifies the minimum requirements to be met by protective clothing against chemicals offering limited protective effect, including reusable protective clothing. Protective clothing against chemicals offering limited protective effect is for use where there is a possibility of exposure to minor chemical spraying, liquid aerosols or low-pressure spattering.

EN ISO 20471
(preceding standard: EN 471)
Warning clothing - Test methods and requirements

EN 20471 sets out the requirements to be met by protective clothing which visually highlights wearers. This is done to make them clearly visible in dangerous situations under all light conditions during the daytime and when vehicle headlights are shone at them in the darkness. This standard specifies performance requirements to be met by the protective clothing in terms of colour and retro-reflection, along with minimum surface dimensions and requirements to be met by materials used in the smallest possible garment size.

EN 17353
Protective Wear – Equipment for enhanced visibility in medium risk situations

This standard specifies the requirements for enhanced visibility equipment for clothing and products capable of visually signalling the presence of the wearer. Enhanced visibility equipment is intended to provide conspicuity to the wearer's presence in medium risk situations in all daylight conditions and/or when illuminated by vehicle headlights or searchlights in the dark. Performance requirements are included for colour

and retroreflectivity, as well as for the minimum area and arrangement of materials in the protective equipment.

EN 343
Protective clothing - Protection against rain

Specifies requirements and test methods for materials and seams used in clothing to protect against precipitation (e.g. rain, snow-flakes), fog and ground humidity. Waterproofness and resistance to water vapour are the properties that must be tested and indicated on the label. The various classes for resistance to water vapour provide an indication for the recommended wearing time in different ambient temperatures.

EN 13758-2
Solar UV protective properties; EN 13758 Part 1: Method of test for apparel fabrics; EN 13758 Part 2: Classification and marking of apparel

The European standard 13758-1 defines the method for determination of permeability of ultraviolet solar radiation for textiles; EN 13758-2 sets out the classification and identification of the clothing. As solar radiation causes skin diseases, only covered surface areas are protected of Type UV-A and UV-B radiation.

EN 14058
Protective clothing - Garments for protection against cool environments

This European standard specifies the requirements and test methods for wear behaviour of garments for protection against cool environments. Use of tested garments in environments with an air temperature of -5 °C and higher. Identification should include classification of overall heat transfer resistance.

EN 342
Protective clothing – Ensembles and garments for protection against cold.

This standard defines the test methods and performance requirements for protective clothing against cold of -5 °C or lower. It tests the thermal insulation and air permeability of the clothing. The test result states how long the wearer of the protective clothing can remain at certain temperatures when stationary or when performing tasks involving small or moderate amounts of movement. Insulation values TEMPEX® Cold Protection: Please note our insulation values table for our TEMPEX® cold protective clothing on page 217. It shows the duration of use of the relevant garments in relation to physical performance and temperature.

EN 511
Gloves as protection in cold environments

This standard defines the test methods and performance requirements for gloves used as protection in cold environments. It measures the insulation performance of the material in the event of contact with a cold object, resistance to the gradual permeation of cold, and thermal resistance in the event of direct contact with a cold object. The 3-digit code next to the standard pictogram indicates the performance levels, where 0 is the weakest and 4 is the best performance. The water resistance is defined with two performance levels: 0 = water permeation after 30 minutes, 1 = no water permeation after 30 minutes.

EN 15384
Protective clothing for the fire brigade for wildland firefighting

This European Standard specifies methods of test and minimum performance requirements for protective clothing, designed to protect the wearer's body, except the head, hands and feet, to be worn in wildland firefighting and associated activities. This clothing is not intended to provide protection during fire entrapment.

EN 407
Gloves as protection against thermal risks

Gloves tested in accordance with this standard provide protection against heat and/or flames. The standard provides six testing options: combustion behaviour, contact heat, convective heat, radiant heat, small splashes of molten metal and larger quantities of molten metal. The actual level of protection depends on which test is carried out during certification and which performance level is achieved, where 1 is the lowest and 4 is the highest. "X" means not tested, "0" means below the minimum requirement.

EN 388
Gloves as protection against mechanical risks

This standard defines the test methods and performance requirements for gloves used as protection against mechanical risks. It provides four testing options: abrasion resistance, cut resistance, tear propagation force and penetration force. The actual level of protection depends on which test is carried out during certification and which performance level is achieved, where 1 is the lowest and 4 (resp. 5) is the highest. "X" means not tested, "0" means below the minimum requirement.

EN ISO 20345
Personal protective equipment – safety footwear

This standard defines basic requirements and voluntary additional requirements for safety footwear for general purposes such as mechanical risks, slip resistance, thermal risks and ergonomic features. The letters SB and S1 to S5 indicate the requirements that have been met.

EN 166
Personal eye protection

This standard defines functional requirements for different Types of personal eye protection equipment and includes basic requirements for all eye protection equipment such as the size of the minimum field of view, flammability, UV resistance or protection against dust, splashes of molten metal and electric arcs. This standard applies to all Types of personal eye protection equipment for protection against a range of hazards encountered in industry or in laboratories.

EN 171

Personal eye protection/infrared protective filter

This standard defines protection levels and transmission requirements for infrared protective filters. The filters defined in this standard are not suitable for the (in)direct observation of electric arcs.

EN 397
Industrial hard hats

Industrial hard hats are primarily intended to protect the wearer against falling objects and their consequences, such as brain injuries and skull fractures. This European standard defines general requirements, test methods and test conditions as well as requirements pertaining to the protective function (e.g. shock absorption and penetration resistance) of industrial hard hats.

EN 50365

Electrically insulating helmets for use on low voltage installations

This standard defines the requirements for electrically insulating helmets for protection when working on or near parts under alternating voltage of up to 1000 V (AC) or direct voltage up to 1500 V (DC). If it is used in combination with other electrically insulating PPE, the helmet should prevent dangerous electric current passing through the head as well as electric shocks. All helmets must also meet the requirements according to EN 397.

EN 13688 Hupf 2
Manufacturing and testing description for universal protective clothing for firemen (Part 2 – Firemen's trousers)

Hupf 2 specifies the minimum requirements to achieve sufficient basic protection for all firemen to protect them against general risks of firefighting service. It applies to the firemen's protective clothing described therein and contains a revision of safety requirements based on the current EN ISO 11612:2013 with regard to materials, sizes, design and marking, as well as adapted test methods. The firemen trousers shall comply with the applicable EN ISO 11612 "Protective clothing - Clothing for protection against heat and flame", the applicable EN ISO 13688 "Protective clothing, General requirements" and this "Manufacturing and testing description for a universal protective clothing for firemen (HuPF)". The protective clothing for firemen is intended to protect the wearer from the hazards of firefighting activities together with the other personal protective equipment required in each case.

All products pictured in this catalogue are certified according to the product specified standards.

Products with reflective stripes may help to improve visibility. If products have reflective stripes it does not automatically mean that they are certified according to EN ISO 20471, but only if the stripes are placed on a high-visibility fabric which has been tested according to EN ISO 20471 and if the EN ISO 20471 standard pictogram is shown on the product label.

SIZES AND CARE

| | | | | | | | | | | | | | | | | |

CUSTOMISED SIZES

HB Protective Wear offers a comprehensive selection of sizes for its collections. However, if you or your staff members require a customised size not included in the stated sizes, we will be pleased to manufacture such garment to your stated body dimensions.

WASHING

The numbers stated in the wash tub correspond to the maximum washing temperatures and must not be exceeded. The single bar below the wash tub requires mild treatment with reduced washing amount and low speed during spin-drying. The double bar means very mild treatment with reduced mechanical load (e.g. wool).

BLEACHING

TUMBLE DRYING

The points state the drying level in the tumble dryer.

IRONING

The points state the temperature ranges of adjustable irons.

PROFESSIONAL DRY CLEANING

The letters are intended for the textile care person. They state the applicable solvents. The bar below the circle requires limitation of mechanical load, moisture addition and/or temperature when cleaning.

PROFESSIONAL WET CLEANING

This symbol identifies articles that can be treated by wet cleaning procedures. It is stated in the second line below the symbol for dry cleaning. The bars below the circle require limitation of mechanical load during wet cleaning. The double bar identifies an even milder procedure.

NOTE ON FLEECE MATERIAL

Fleece material may produce lint initially, depending on the design. This will stop after a few washes.

NOTE ON FLUORESCENT COLOURS

Fluorescent colours which are constantly exposed to UV radiation will fade more quickly. High-visibility clothing should therefore not be stored in direct sunlight.

NOTE ON TEMPEX® COLD PROTECTION GARMENTS

In order for you to be able to take advantage of your high-quality protective equipment for as long as possible, it is important to keep the following instructions in mind.

- Please hang up the clothing after each use and dry it in a sufficiently heated and well-ventilated room.
- Avoid pressing the garments during storage – e.g. in narrow lockers.
- Never hang or lay the clothing onto hot heat sources.
- The garments should never be exposed to temperatures above +50 °C.
- We absolutely recommend regular professional cleaning or washing according to the instructions on the label of the garment.

THE PRO LABEL: GARMENTS SUITED FOR INDUSTRIAL LAUNDRY

HB products with this label are suitable for industrial laundry and meet the requirements of ISO 15797 for washing and drying processes in industrial laundry. Only textiles that are resistant to the conditions of these care

procedures can be labelled with a care symbol for industrial laundry.

Drying symbols:

Washing symbol:

The numbers refer to the eight ISO 15797 washing processes

LEGEND

MULTI-RISK PROTECTION
Collections and items marked with "Multi-Risk" are certified according to minimum 4 EN standards. Therefore these are suited for work areas with multiple application fields.

FEMALE CUT
Tailored with fitted waist and especially made for women.

HIGH-SPEED DELIVERY SERVICE
These products are available in 21 days (Germany). Our PPE service for urgent needs. Abroad delivery takes few days more.

LIGHT-WEIGHT FABRIC
If you see this icon the product line is manufactured with extraordinarily light-weight fabrics.

GARMENT WEIGHT
The garment weight tells you how much exactly weighs the item, based on a medium size (M or 52).

DEEP FREEZING COLD STORE PLUS
Clothing for low-movement tasks at temperatures down to -49 °C

DEEP FREEZING COLD STORE
Clothing for high-movement tasks at temperatures down to -49 °C

COOLING CHILLROOM
Clothing for work in moderately cold conditions

READY TO WEAR
This collection can be configured individually (216 colour combinations, 12 equipment versions) and will be with you within 21 days.

SUSTAINABILITY
Products with this icon are made of sustainable eco-friendly materials like organic cotton or recycled PET bottles.

ERGONOMIC DESIGN
Product line with ergonomically optimised cut for more freedom of movement.

BREATHABILITY
This product offers a pleasant wearing and climate comfort thanks to its fast drying material and a quick moisture transport.

BODY MAPPING
This product takes into account the different requirements of the individual areas of the body, with flex and transpiration zones allowing greater freedom of movement and reliable moisture transport.

ATPV = Arc Thermal Performance Value:
Thermal value, which indicates the energy applied to a textile material where there is a 50 % probability of second degree skin burns, given in cal/cm² or kJ/m² = heat quantity per unit of area.

EBT50 Breakopen Treshold Energy:
Thermal value which illustrates the impact energy on a textile material at which there is a 50 % probability of the material breaking open before an ATPV value can be determined, given in cal/cm² or kJ/m² = heat quantity per unit of area.

Both values – ATPV and EBT50 – show the load limits of the material or material layers. The higher the value, the better the protection.

HAF = Heat Attenuation Factor:
Alongside the arc performance values, the HAF – Heat Attenuation Factor – is also determined. It indicates the amount of energy, expressed as a percentage, blocked by the material and not penetrating through the textile surface to the skin.

4kA and 7kA/4kA
Our arc flash protective garments all have a "4kA" or "7kA/4kA" or "7kA" embroidery on the front to show the wearer what kind of protection the garment provides.

- 4kA: the garment provides class 1 arc flash protection.
- 7kA/4kA: the garment provides class 2 arc flash protection for all double-layer parts – meaning the front parts of the jackets and the front parts of trousers and bib and brace trousers.
- 7kA: the garment provides class 2 arc flash protection.

Reflective stripes
If products have reflective stripes it does not automatically mean that they are certified according to EN ISO 20471, but only if the stripes are placed on a high-visibility fabric which has been tested according to EN ISO 20471 and if the EN ISO 20471 standard pictogram  is shown on the product label.
