

▶ HB-4welders® 2.0

**NEVER BEFORE HAS WELDING PROTECTION
BEEN SO LIGHT-WEIGHT, SAFE AND COMFORTABLE**

Flying sparks, molten iron splashes and radiant heat: Today's welding protection has to meet increasingly demanding requirements and therefore we have improved our already successful HB-4welders® collection. How you ask? Well we have introduced an exclusive new high-performance fabric from Schümer for our **HB-4welders® 2.0**

This fabric is light-weight, comfortable and heavy-duty. It offers similar protection for the wearer than many heavier welding garments but providing a far greater degree of comfort.

ELABORATE DESIGN

Thanks to our innovative design and pattern technology along with high-quality detailed workmanship, our garments provide maximum safety for welding work. All outside pockets have been elaborately designed ensuring compliance with the relevant EN standards meaning that welding spatter can easily roll off.

HB-4welders® 2.0: MAXIMUM PROTECTION WITH HIGH COMFORT

- The ideal garments for heavy-duty welding work
- Protection against molten metal splashes, sparks, welding beads and radiant heat
- Highly stressed areas are manufactured with twin layers
- Light-weight and comfortable fabric structure
- Ergonomic cut for more freedom of movement
- Combines high protection with unsurpassed comfort.
- Working safe while looking good thanks to modern design
- Also available via our high-speed service 21 TO WEAR within 21 days in Germany (outside Germany requires a few days more).

NEW MATERIAL: THE ULTIMATE WELDING PROTECTION

HB-4welders® 2.0 is customised to meet the demands of the wearer.

Performance · The selected fibres and the innovative yarn construction give an improved mechanical resistance to the fabric. Therefore it is exceptionally suited for high exposure at the workplace as well as for industrial laundry.

Protection · Thanks to the extremely smooth fabric surface it reliably ensures that welding droplets or iron splashes and sparks easily roll off even after multiple washes.

Comfort · Due to its high cotton content and clever weave construction it offers improved humidity control, breathability and freedom of movement – all providing enhanced wearer comfort. You can feel that the garments are much lighter and more comfortable than traditional heavy cotton welding protection.

Highly stressed areas are manufactured in double-layer

Sleeve hem with adjustable snap fastener

2 | TROUSERS
