

CHEMICALS

WHEN HAS RELIABLE PROTECTION EVER GIVEN YOU SO MUCH FREEDOM?

There are many dangers in the workplace: if chemicals are involved, for example, they are sometimes barely perceptible. Reliable PPE prevents from accidentally penetrating the skin when coming into contact with hazardous substances. At the same time, it should be light and comfortable to wear over a long working day. That's why we only use materials that fulfil the relevant safety standards as well as our high standards of comfort. A feeling of freedom included.

The items shown are exclusively intended for professional use and for commercial customers as well as organisations such as fire brigades and youth fire brigades.

Model: Kai, Project Management
Collection: HB-CHEMprotect®

HB-CHEMstandard

Comfortable in dangerous environments: HB-CHEMstandard combines reliable chemical protection in accordance with EN 13034: type 6 and extraordinary wearing properties that even have the benefit of being slightly warming due to the characteristics of the material.
