

COLD PROTECTION

WHEN IT'S REALLY COLD, YOUR OUTFIT SHOWS ITS STRENGTHS

Does your job sometimes feel like an endurance test in inhospitable polar regions? Then you'll find the right outfit for you in our cold protection range. The great thing about it: The various collections have been specially developed for extreme temperatures in cold stores and designed so that the individual products complement each other and can be combined individually. From head to toe, from the inside outside.

The items shown are exclusively intended for professional use and for commercial customers as well as organisations such as fire brigades and youth fire brigades.

Model: Marc, Disposition
Collection: TEMPEX® COLD Pro

TEMPEX® CLASSIC

CHILLROOM

PPE for work in moderately cold conditions at temperatures between 0 °C and 10 °C.

INTENSITY OF MOVEMENT: normal

TEMPEX® THERMO ACCESSORIES

In a multi-layered clothing system the underwear plays an important role. It protects the wearer from cooling down due to the close-to-skin fit providing insulating and moisture-regulating properties. Our underwear offers high wearing comfort and allows a climate regulation for high active working thanks to its material composition.

GRS – Global Recycled Standard

This product is developed from recycled PET bottles which have been collected in Europe and is GRS certified. The production of the rPET yarn requires 60 % less energy and avoids 2.4 kg of waste per kg of yarn. GRS is an international, voluntary and full product standard and defines requirements for the certification of recycled materials in terms of chain of custody, social and environmental practices and chemical restrictions.

TEMPEX® THERMO ACCESSORIES

With us, you will find the right cold protection gloves for your work in the deep-freeze or cold room area – suitable for a wide range of applications in trade as well as in industry, logistics and research.

Besides our new cold protection gloves with certified protection against cold and mechanical risks, which are particularly suitable for order pickers, we also offer fleece and underlay gloves.

Protective gloves against cold EN 511:2006

This standard specifies the test methods and performance requirements of protective gloves against cold. The insulating capacity of the material on contact, the resistance to progressively penetrating cold and the thermal resistance to direct contact with a cold object are measured. The three-digit code next to the standard pictogram indicates the performance levels, with 0 corresponding to the weakest and 4 to the highest performance. Water resistance is defined with two performance levels: 0 = Water penetration after 30 min, 1 = No water penetration after 30 min.

Performance levels for protective gloves against cold according to EN 511

Test	Performance Level			
	1	2	3	4
Convective Cold Thermal Insulation/ t_{TR} (in $m^2 K/W$) (Insulation value)	$0,10 \leq t_{TR} < 0,15$	$0,15 \leq t_{TR} < 0,22$	$0,22 \leq t_{TR} < 0,30$	$0,30 \leq t_{TR}$
Contact Cold Thermische Isolation/ t_{TR} (in $m^2 K/W$) (Widerstandswerte)	$0,025 \leq R < 0,050$	$0,050 \leq R < 0,100$	$0,100 \leq R < 0,150$	$0,150 \leq R$
Waterproofness	No water penetration			

4 means the highest and 1 means the lowest performance level.
X means "not tested". 0 means "below the minimum requirements".

Protective gloves against mechanical risks EN 388:2016

This standard specifies the test methods and performance requirements of protective gloves against mechanical risks. The specific protective performance depends on which test is carried out during certification and which performance level is achieved, 1 being the lowest and 5 the highest performance level. "X" means not tested.

Test	Performance Level				
	1	2	3	4	5
Abrasion resistance (Number of cycles)	100	500	2000	8000	
Cutting resistance (Factor)	1,2	2,5	5,0	10,0	20
Tear strength (in newton)	10	25	50	75	
Cutting strength (in newton)	20	60	100	150	

5 means the highest and 1 means the lowest performance level.
X means "not tested". 0 means "below the minimum requirements".
